Professional Summary

Strategic and results-oriented Senior Analyst with over 6 years of experience leveraging data to drive business intelligence, customer insights and product strategy within the telecommunications sector. Skilled in designing data pipelines, building interactive dashboards and leading cross-functional initiatives that turn complex data into clear and actionable strategies. Experienced in working with GSM usage data, call detail records (CDRs) and customer lifecycle analytics to support acquisition, retention and targeting programs. I am skilled in Python, SQL, Power BI and Excel with a strong foundation in process optimization, testable requirement development and continuous improvement.

Professional Experience

Airtel Kenya — Senior Marketing BI Analyst

Nairobi, Kenya | May 2021 – Present

Responsibilities:

- Lead end-to-end analysis of Voice, Data, SMS and customer life cycle datasets to support acquisition, retention, engagement and revenue growth initiatives.
- Define and track core KPIs, ensuring consistency of definitions and alignment across marketing, product, CVM and regional teams.
- Support weekly, monthly and ad-hoc performance reviews by delivering timely diagnostics, insights and data-driven recommendations.
- Partner with product and marketing squads to translate business needs into structured analytical problems and actionable insights.
- Conduct deep analyses on consumer behavior, usage trends and churn signals to identify risks and growth opportunities.
- Facilitate cross-functional workshops to gather requirements, align stakeholders and embed data-driven performance rituals.

- Own the analytical life cycle from requirements gathering, data extraction, validation and modelling to final insight delivery.
- Design, build and maintain automated Power BI dashboards serving as a single source of truth for commercial, usage and campaign performance.

Key Achievements:

- Consolidated multiple legacy reports into a single executive dashboard, significantly improving leadership visibility and decision turnaround time.
- Automated recurring KPI reporting, reducing manual reporting effort and improving accuracy and timeliness.
- Delivered customer and usage insights which contributed to growth in the active customer base.
- Enabled faster campaign optimization through near-real-time performance tracking and diagnostic reporting.

Rite Solutions Ltd — Junior Data Analyst

Nairobi, Kenya | Jan 2020 – Apr 2021

Responsibilities:

- Performed real-time transaction monitoring and behavioral analytics to support strategic planning, segmentation and fraud detection initiatives.
- Designed and maintained Excel-based dashboards providing rapid visibility into market, sales and operational performance.
- Supported cross-functional teams with ad-hoc analyses to inform customer engagement and operational decisions.
- Automated manual data processing and reporting workflows using advanced Excel functions and scripting.

Key Achievements:

- Reduced reporting lag by automating dashboards, enabling faster operational decision-making.
- Improved reporting accuracy and consistency across teams through standardized templates and processes.
- Delivered actionable insights that supported enhanced customer engagement and retention strategies.

Responsibilities:

- Conducted customer and digital performance analysis to support sales and marketing alignment.
- Executed SEO audits and analyzed website performance metrics to inform content optimization strategies.
- Assisted in preparing performance reports and dashboards for internal stakeholders and clients.

Key Achievements:

- Increased organic website traffic through targeted SEO improvements and keyword optimization.
- Supported growth in inbound leads by aligning digital content with customer behavior insights.
- Helped streamline internal reporting processes, improving visibility into campaign performance.

Core Skills:

- **Consumer Performance & KPI Management:** End-to-end performance measurement across Consumer Business, supporting weekly and monthly executive reviews. KPI framework design covering revenue, usage, ARPU, churn, conversion and channel performance. Performance diagnostics, variance analysis and scenario-based recommendations.
- **Consumer Behavior & Revenue Analytics:** Advanced analysis of GSM usage data, CDRs and customer lifecycle metrics. Root-cause analysis of ARPU, churn, bundle performance and engagement trends. Segmentation and cohort analysis to support proposition design, pricing and GTM execution.
- **CVM, Campaign & Digital Journey Analytics:** Campaign performance evaluation and targeting optimization in partnership with CVM and Marketing. Digital journey analysis to identify drop-offs, friction points and conversion opportunities. Test-and-learn analytics to improve campaign ROI and customer lifetime value.

- **Reporting, Dashboards & Data Storytelling:** Design and delivery of executive-ready Power BI dashboards as a single source of truth. Automation of recurring reports to improve timeliness and decision readiness. Translation of complex data into clear commercial narratives and insight briefs.
- **Commercial & Financial Acumen:** Strong understanding of consumer telecom revenue drivers. Support to Consumer P&L narratives through behavioral and performance insights. Validation of assumptions behind offers, bundles and product features.
- **Data Governance & Quality Assurance:** Ownership of the full analytics lifecycle from requirements to insight delivery. Enforcement of KPI definitions, data accuracy and consistency across reporting. Proactive identification and resolution of data quality issues.
- **Tools & Technologies:** Power BI (DAX, Power Query, data modelling, automation).SQL, Python, Advanced Excel. Analytical techniques: KPI modelling, segmentation, cohort analysis, churn diagnostics
- **Agile Analytics Business Partnering:** Trusted analytics partner to Product, CVM, Digital, Finance, Operations and CX teams. Active participation in agile ceremonies (standups, sprint planning, backlog prioritization). Translation of stakeholder needs into structured analytical problems and actionable outputs.
